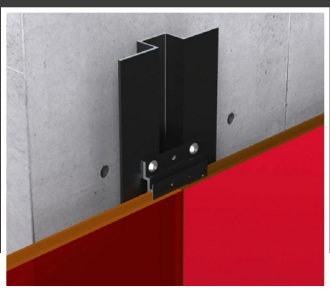
FASTMAX MODULO | Fundermax

Need your panels quicker? Use our **FastMax program for Modulo!**

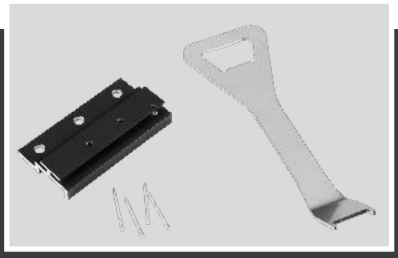
FastMax fabricates Modulo planks within just **6 weeks**, accelerating this process more than ever before. This provides a level of predictability, allowing you to better plan your Modulo project timeline with confidence.

What is the MODULO Fastening System?



Fundermax's Modulo is a concealed fastener, closed joint modern façade plank system with high versatility.

Employing a concealed clip system with routed edges, the panels can be installed in a stacked bond, running bond, or a combination of both, with plank heights ranging from 6 to 24 inches (going up in 1/2" increments) to maximize design freedom in exterior applications.



Modulo Accessories
