Provide us a layout

The layout will help us understand panel sizes, spaces, and how the graphic goes together.

Formats

01	250 x 2000 mm	02	500 x 195 mm	03	500 x 1800 mm	04	250 x 2000 mm
05	500 x 2000 mm	06	500 x 195 mm	07	500 x 1800 mm	08	1000 x 2000 mm

Checklist:

- Document formats**
 The documents have been created in their final size 1:1 or 1:10.
- File size**
 The image data has a print size of at least 90 dpi (ideally 180 dpi).
- Processing**
 My data is already rotated in the required orientation in the image processing program, not converted to a higher resolution.
- Image compression**
 All data has been compressed without loss (e.g. TIFF with LZW).
- Completeness**
 All the image and graphic elements that I have positioned in my document have been sent via online-file sharing solution or email. All written texts have either been converted to paths or have already been sent.
- Layout**
 The print file and elevations showing dimensions and joint sizes are enclosed.

Fundermax will only provide the graphic panels. The installer will need to provide the rainscreen mounting system, fasteners, and engineering.
